## Customer Information Regarding the EU Packaging Regulation (PPWR) Confirmation of Compliance for Power and Connection Cables

Dear Sir or Madam,

As a responsible company, we closely monitor legislative developments within the framework of the European Green Deal. We hereby inform you about the status of our preparations and confirm the compliance of the packaging supplied by us with the requirements of the new **EU Packaging and Packaging Waste Regulation (PPWR)**.

As a manufacturer and distributor of power and connection cables, technical safety and functionality are our primary concerns. Due to the nature of our products, our packaging is limited to the minimum necessary and essentially consists of:

- **Cartons / transport packaging** (for bundling and protecting cables)
- **Labels and markings** (for complete identification and traceability)
- *Optional: packaging aids such as cable ties or wrapping materials, where required for transportation*

To ensure compliance with all legal requirements throughout our entire supply chain, we maintain continuous communication with our partners.

### We hereby confirm:

1. **Supplier compliance:** We have obtained legally binding confirmations from all of our suppliers of packaging materials (cartons, labels, etc.) verifying compliance with the requirements of the PPWR.

- 2. Recyclability & material minimization:** The packaging used by us complies with the principles of "Design for Recycling." It has been reduced to the minimum necessary weight and volume in order to conserve resources and prevent waste.
- 3. Documentation obligations:** By maintaining complete records of supplier confirmations, we fully comply with our legal documentation and proof-of-compliance obligations.

With this declaration, we ensure that the packaging of the products supplied by us complies with current European environmental standards and that you may further process or place these products on the market without restriction.

Should future country-specific implementing provisions or additional labeling requirements under the PPWR result in changes, we will proactively implement such requirements.

This letter serves as a generally valid confirmation for your records. Separate certificates or product-specific individual declarations will not be issued.

Yours faithfully,

HANS WAGNER GMBH
