

power cords

Strong hold, even under vibration – IEC 60320 C13 connector with locking system.

Our **C13 connector with locking system** ensures a reliable power supply in demanding environments – from data centers and laboratories to vibration-heavy applications.

The locking function reliably prevents accidental unplugging, while the red release switch ensures easy, intentional disconnection.

With a 10 A load capacity, tested and certified by KEMA-KEUR (DEKRA), it combines proven quality with an extra layer of safety.

Type of plug	Can be combined with various country-specific plugs or assembled with an open end
Standard	EN IEC 60320-1:2021
Lengths	Upon request
Type of cables	H05VV-F 3 G 0,75 / H05VV-F 3G 1,0 SJT 3 x 18 AWG / SJT 3 x 16 AWG / SJT 3 x 14 AWG
